Quality Assurance Engineer

Detail-oriented and results-driven Manual/Automation Tester with 2.5+ years of experience software quality assurance In Cognizant Technology Solutions Proficient in designing, developing, and executing manual test cases as well as creating and maintaining automated test scripts. Skilled in identifying defects, troubleshooting issues, and ensuring the overall quality of software products across various platforms. Adapt at collaborating with cross-functional teams to understand requirements and deliver high-quality solutions within tight deadlines. Proven ability to adapt quickly to new technologies and methodologies while continuously improving testing processes to enhance efficiency and effectiveness.

WORK HISTORY

Cognizant Technology Solutions-

July-2022- Till Now

- Developed comprehensive test cases and test plans based on project requirements and specifications.
- Conducted system-wide testing to ensure quality and accuracy of software products.
- Established elective communication channels between QA, development and project management teams to foster a collaborative working environment focused on delivering high-quality products.
- Documented test results, identified defects, and tracked their resolution using defect tracking tools like Jira and confluence ensuring timely resolution of reported issues and maintaining clear communication with stakeholders.
- Increased product reliability by performing thorough functional and regression testing on each release cycle.
- Collaborated closely with development teams to improve software functionality and stability.
- Participated in agile development practices such as sprint planning meetings and daily stand-ups, retrospective calls contributing variable input from a QA perspective throughout the project life cycle.
- Demonstrated new product features and functionality to project stakeholders.
- Participated in test case reviews and provided feedback to improve test coverage and accuracy.
- Lead the team from upfront and delivered test strategies, plan and coordinate end to end testing
- Met tight deadlines to satisfy client demands and project timelines.
- Implemented automated testing solutions ,utilized automated testing tools such as Selenium WebDriver to enhance testing efficiency and coverage.
- Optimized test cases to maximize success of manual software testing
- Contributed to the establishment of a primitive company culture by actively participating in team-building events and demonstrating a strong commitment to collaboration and continuous improvement

PROJECTS:

Domain-Banking and Finance Services:

- Design and develop Test plan and test scripts based on User stories.
- Analyzed the Business Requirements Document , designed the detailed test design for new Functionality.
- Perform Frontend and Backend testing of all the modules using Manual as well as Automation techniques.
- Logged and track defect using **JIRA**.
- Prepare and execute test script using selenium.
- Locating Web Elements using different Locators such as X Path , Id , CSS Selector etc.

SKILLS AND TOOLS

- Manual Testing
 - Automation Testing
 - Selenium
 - API Testing with Postman
 - Test NG
 - Java
 - Eclipse
 - Agile Methodology
 - Functional Testing
 - Git
 - Selenium
 - JIRA
 - Leadership & Communication
 - Team management
-

AWARDS & RECOGNISATION

- Award for raising more number of defects from the project during a critical release.
 - Award for the outstanding team performance on multiple critical releases.
-

EDUCATION

- **Bachelor of Technology**
2018-2022
ABES ENGINEERING COLLEGE, GHAZIZBAD
 - **HSS - 2017-2018**
KJ MODERN INTER COLLEGE, LUCKNOW
-
