Quality Assurance Engineer

QA Strategies | Specializing in Application Testing | QA Methodologies and Tools

Motivated and results-driven Test Engineer with 2+ years' experience in gathering requirements and developing test cases for technical products. Proven ability to identify business needs and develop valuable solutions to improve accuracy and process efficiency. Seeking an opportunity to drive business effectiveness through my experience.

WORK EXPERIENCE

- **PS INTELEGENCIA ANALYTICS**

July 2022 - Present **Quality Engineer I**

- **Radisson Hotel**

Dec 2020-March 2021 **Front Office Receptionist** (3 Month Industrial Training Exposure)

Projects:

Total Benefit Solution - (Jan 23- Present)

It is an insurance app that uses a specific web application to provide health insurance for business groups, seniors, and families. This app allows users to learn about the benefits of insurance plans available in their states. Total Benefit Solutions offers a broad choice of plans at different price points, for groups as small as two.

Roles & Responsibilities :

- Performed smoke, functional, regression, ad-hoc, and end-to-end testing.
- Involved in test case creation, test case execution, and defect reporting for the web application.
- Participated in sprint planning meetings every week.
- Gained manual testing experience in mobile and web applications.
- Interacted with clients and developers regarding project-related queries.

2U - (July22 - Jan 23)

2U is an E-learning model website which are diverse collection of innovators, dreamers and doers all working to improve lives through higher education.

Roles & Responsibilities :

- Performed smoke, functional, ad-hoc, regression, and release testing, as well as QA sign-off.
- Attended Scrum ceremonies and interacted with clients to understand business requirements.
- Created test cases using the TestRail tool, executed the test cases, and logged bugs in JIRA.
