Projects

Project 1 Description:

Konnect.Travel has an inbuilt CRM (customer relationship management) for client management, inquiry management and supplier management. It offers post booking management with workflow automation using internal booking queues, auto import & fulfil processes. It has a very comprehensive financial system to automate accounting and reconciliations. It is a powerful all-in-one suite that provides the capability of a Travel CRM, Mid office, and Accounting System in one single interface.

Project 2 Description:

Softtron HMS is a web based B2C application. It allows the client to manage important Activities in the hospital like employee details, patient history, blood donor information. It also allows patients to book appointments online. The application helps employees namely doctors, nurses, pharmacists, laboratorists and accountants of the hospital to manage their day to day activities.

Project 3 Description:

In order to speed up the decision making process It is integrated with a unique dashboard which gives both corporate travelers and implant a clear concise interface to search and book fares. And accordingly automatic and uniformed approval emails for online and offline bookings can encompass multi-tier approval processes and travel policies for the travelers according to their designation, departments, user roles and accordingly booking work flow can be managed.

Project 4 Description:

The project involved testing the Saudia Airlines website and mobile application to ensure seamless functionality and a smooth user experience for booking flights, managing reservations, and accessing various services.

Work History

EchtTech Consultancy Services Pvt Ltd (Feb- April'24)

- Worked at client location at EPFO National Data Centre, Delhi.
- Conducted UAT and provided feedback to the development team & client.
- Performed Manual & Api testing on web application.

Bectron Technology (Feb'23- Jan'24)

- Conducted functional, regression, and performance testing, reporting defects in a clear and concise manner.
- Collaborated with the QA & dev team to enhance testing processes and methodologies.

Internship

- 6 months Internship in Software testing from Qspiders. (July'22-Dec'22)

Key Achievements

- Reduced bug report turnaround time by 25% through efficient testing processes.
- Played a key role in the successful release of a major software update, contributing to a 20% increase in user satisfaction.
- Coordinating test activities and ensuring project deadlines are met.

Educational Qualification

- B.E (ECE) 8.39 CGPA from RGPV University Bhopal.

Declaration

- I do hereby declare that above information is true and complete to the best of my knowledge and belief.
