Worked as **Sr. Representative, Operations** in Concentrix since November 2022 – December 2024

Project: Aart tool [Manual & Automation]

Automation Tool: Selenium Web Driver [Eclipse]

Description: It is a company internal tool designed to handle and organize advertising data such as spending, product details, advertisements, URLs, and advertiser account information. Managed interactions between product owners and advertisers and monitored promotional activities across multiple regions.

ROLES AND RESPONSIBILITIES:

- Analyzing the user stories and preparing test scenarios based on acceptance criteria.

- Reviewing test scenarios and identifying test cases for both manual and automated testing using Selenium WebDriver.

- Understanding QA within the Software Testing Lifecycle.

- Involved in creating and maintaining test plans and test cases in accordance with changing requirements.

- Involved in executing regression scripts and analyzing results as part of the application testing process using QA methodology.

- Involved in writing automation script by using Selenium WebDriver with Cucumber.

- Developing BDD tests using Cucumber by writing feature file and Step definition.

- Develop and document detailed, reusable, and maintainable test cases for automation, ensuring coverage of functional and non-functional requirements.

- Identify and create necessary test data for automation scripts to ensure comprehensive test coverage.
