ASHISH BOLE
Software Development Test Engineer

✉ boleashish01@gmail.com 📞 +91 7020339842

PROFILE SUMMARY

- Experienced Software Test Engineer expertise in automation testing for web and mobile applications. Proficient in developing scalable test frameworks, integrating CI/CD pipelines, and ensuring cross-browser and cross-platform compatibility. Skilled in API testing, mobile testing with Appium, and utilizing tools like Selenium, TestNG, and Jenkins for efficient test execution and reporting.

WORK EXPERIENCE

Amulya IT Solutions Pvt Ltd

Software Development Test Engineer   NOV 2021 - JAN 2025

- Developed reusable automation scripts using Selenium WebDriver with Java for web applications and Appium for mobile testing across Android and iOS platforms.
- Designed and implemented scalable test automation frameworks, leveraging Page Object Model (POM), Behavior-Driven Development (BDD) with Cucumber, and TestNG for efficient test class creation.
- Streamlined CI/CD pipelines by integrating test automation with Jenkins, enabling seamless automated execution and timely delivery.
- Conducted cross-browser compatibility testing across Chrome, Firefox, Internet Explorer, and Safari, executing parallel test cases using Browser Stack for optimized efficiency.
- Enhanced test frameworks by introducing best practices, incorporating Git for version control, and conducting code reviews to maintain code quality.
- Extensively used the TestNG framework for test case creation, parallel execution, and generating detailed reports.
- Verified API functionality through comprehensive endpoint testing, request/response validation, parameter testing, and error code handling using tools like Postman.
- Performed comprehensive functional testing, validating user interface (UI), user experience (UX), and application workflows to ensure compliance with business requirements.
- Conducted regression testing to verify existing functionalities remained intact after code changes or enhancements.
- Executed end-to-end testing to validate the complete application workflow, including integration points with third-party services.

SKILLS

- Languages: Java
- Automation Tools: Selenium , Appium, TestNG, Cucumber
- API Testing: REST APIs, Postman
- CI/CD Tools: Jenkins
- Version Control: Git, GitHub
- Platforms: Windows, Linux, Android, iOS
- Project Management: Jira
- IDEs: Eclipse, VS Code
- Manual Testing: Functional Testing, Performance Testing, Test Plan Creation

PROJECT

Edutech Child Training Application

- Automated testing for a web application in the Edutech domain, focusing on child trainer education.
- Created and executed detailed test cases for multiple browsers, ensuring high-quality delivery.
- Developed automation scripts to validate functionality, scalability, and performance.

Geek Pay Loan Banking Application

- Automated tasks for a web application in the Banking domain related to the GeekPay.io portal.
- Utilized APIs to handle data retrieval and automation.

CERTIFICATIONS

- SIX-MONTH INTERNSHIP-BASED TRAINING IN JAVA, SCOOPEN TECHNOLOGIES.
- CERTIFICATION OF COMPLETION: JAVA COURSE, PROFOUND EDUTECH, PUNE.

EDUCATION

B. E.| PUNE UNIVERSITY

2016 – 2020

- Electronics and Telecommunication
