Test Analysis	TestNg Framework	GitHub	Debugging	Cross Browser Testing
Agile Methodology	Cucumber Framework	Jenkins	Selenium Java	

DESIGNATION & PROJECTS -

Working as a "QA Automation Engineer " at MYVA TECHNOLOGIES PVT LTD   July 2023 - Present

Conducted comprehensive quality assessments & analysis across various software projects at Myva Technologies Pvt Ltd. Responsibilities included developing and executing test plans, performing manual and automated testing, and ensuring adherence to quality standards. Collaborated closely with cross-functional teams to identify and address defects, driving continuous improvement in product quality. Employed various testing methodologies and tools to validate software functionality, usability, and performance. Contributed to the enhancement of testing processes and methodologies, resulting in improved efficiency and product reliability.

PROJECTS

1. **Project Title** - Airbnb Website functional testing
   Domain   - Travel & Hospitality
   Duration   - August 24 to Till Date
   Tools Used   - Selenium WebDriver , TestNg Framework , Selenium Java , Eclipse IDE.

Project Description :
Implemented and automated testing procedures for Airbnb's online marketplace platform, ensuring smooth functionality and enhancing user experience. Responsibilities included test case development, execution, and maintenance to ensure the reliability and quality of the platform.

Role : Quality Analyst

Responsibilities :

- Developing and executing comprehensive test plans and test cases to ensure the quality and functionality of Airbnb's online marketplace platform.
- Conducting manual and automated testing across various features and components of the platform, including user authentication, booking workflows, payment processing, and communication channels.
- Collaborating closely with cross-functional teams including developers, designers, product managers, and business stakeholders to understand project requirements and ensure alignment with quality standards.
- Identifying, documenting, and tracking software defects and issues using defect tracking systems such as Jira, and working with development teams to prioritize and resolve them.
- Performing regression testing after software updates or changes to verify that existing functionality remains intact.
- Providing feedback and recommendations for improvements to the software development process, including testing methodologies, tools, and best practices.
- Participating in agile ceremonies such as sprint planning, daily stand-ups, and retrospectives to provide input on quality-related matters and ensure timely delivery of high-quality software

2. **Project Title** - Automated Testing Implementation for TrustLink CRM
   Domain - Financial Services Solution
   Duration - September 23 to July 24

Project Description -

This project aims to implement automated testing processes for TrustLink CRM to streamline testing efforts, reduce manual workload, and ensure the reliability of the CRM system. By developing reusable test scripts, integrating them into the CI/CD pipeline, and collaborating with cross-functional teams, the project endeavors to improve testing efficiency and support continuous delivery of high-quality software.

Role - Quality Analyst
Responsibilities -

- Developed automated test scripts to validate TrustLink CRM functionalities, ensuring accuracy and reliability.
- Collaborating with the development team to integrate automated tests into the CI/CD pipeline for seamless execution.
- Conducted thorough analysis of testing requirements and identifying critical scenarios for automation.
- Contributing to the selection of appropriate automated testing tools and frameworks compatible with TrustLink CRM.
- Documented test plans, test cases, and guidelines for automated testing processes to ensure clarity and consistency
- Continuously monitored and optimized the automated test scripts for performance and efficiency.
- Participated in regular status meetings, reporting progress, identifying challenges, and providing recommendations for optimization.
